ABOUT ME

Frontend Developer with experience in creating and optimizing user interfaces for various web applications, including:

- **SaaS platforms** — interfaces for business applications.
- **E-commerce** — scalable and user-friendly online store solutions.
- **Social platforms** — functionality for user interaction.
- **Content platforms and blogs** — responsive, SEO-optimized interfaces for content publishing.

Skilled in modern frontend technologies, team collaboration, and performance optimization. Focused on clean, maintainable code and user-centered solutions.

PROJECTS

Loomi

A corporate website on which the company's services are presented, as well as a feedback form.
Role: Development of all project pages, as well as their localization.

One of theme

Blog site with integrated headless CMS for content management.
Role: Developed the main static pages and layout, and also used integration with CMS for some blocks on the pages.

Invictusgames

Website for organizing sporting events.
Role: Changing and improving content, implementing a registration form, regularly updating content and adding new pages as needed
